

TrapServer™

by SchoRen NMS Solutions, LLC

Integrated Badger NetManager

TrapServer augments monitoring of NetManager

- Enables NetManager to Monitor SNMP V1 & V2, TL-1 and ASCII elements
- All alarms viewed on NetManager GUI
- Supports Web based Report generation
- Multi-colored on-screen alarm text
- Supports dial-up text reporting elements
- Email/Paging option available
- Dispatch to scheduled technician
- Provides years of alarm data storage
- Manages connection to Craft Port of Network Element based upon user name and password protection
- Send alarm reminders at user defined time intervals
- Relays alarms to other management platforms

TrapServer™ provides a gateway into an SNMP Managed environment and manages all other devices using SNMP, ASCII and TL-1 at the site. **The NOC then has a common interface and database** for all equipment.
