by SchoRen NMS Solutions, LLC

Region/Site IP Isolation Application

Mediation Tool for Alarm Management

- Reduces need for 1000's of IP addresses to administer
- Simplifies the management of IP addresses at the monitored site
- Simplifies alarm traffic to the NOC
- Isolates the IP at the Region
- Relays SNMP Traps to OSS
- Decreases alarm traffic to NOC with user definable alert severities
- Logs alert messages for future retrieval
- Directs SNMP Traps to Multiple SNMP Managers (V1/V2)
- Monitors ASCII & SNMP
- Alerts are sent upon failure on the ASCII monitoring link
- Sends reminders of Standing Alarms at User defined intervals
- Installation is included.

TrapServer™ provides a gateway into an SNMP Managed environment and manages all other devices using SNMP, ASCII and TL-1 at the site. **The NOC then has a common interface and database** for all equipment.
