

TrapServer™

by SchoRen NMS Solutions, LLC

Craft Access Security Module

Access to Craft Port of any Network Element

- Provides a “**Secure**” method for Craft access of Network Elements
- Saves Windshield Time
- Brings Network Element to the Expert
- Supports retrieval of information about a problem prior to dispatching craft
- Use on-site wait time to get work done at other sites
- No programming required
- User-Name and Password Protected
- SSL encrypted
- Alert messages are logged for future retrieval
- Directs SNMP Traps to multiple SNMP Managers (Ver 1 & 2)
- Communications failure on the RS232 link will create an alarm

TrapServer™ provides a gateway into an SNMP Managed environment and manages all other devices using SNMP, ASCII and TL-1 at the site. **The NOC then has a common interface and database** for all equipment.
